

REDIGREE STOCK SENT TO AMERICA

Green Angus and Short-horn Cattle Reach Boston A-board Rhode Island.

One of the most interesting cargoes brought to Boston in recent months arrived here lately in the Furness line steamship, Rhode Island, Capt. Fairclough, from Glasgow, which tied up early in the day at Pier 50, Mystic Docks, Charlestown. Pedigree cattle and prize hunters occupied one section of the vessel.

Although the animals received the constant care of a corps of attendants during the passage, one valuable heifer died and the carcass was thrown overboard. Two calves were born the next day, but one died; so the total number landed was the same as the number taken on board.

Real Scotch whiskey, 100 cases of it, was included in the cargo and this consignment came in for special attention from the customs officials. It is consigned to a local importing house and will be used for medical purposes.

The steamer brought 35 Aberdeen

Angus and 35 short-horn cattle, valued at \$125,000, consigned to Carpenter & Ross, of Mansfield, O., and 29 half-bred hunting horses for George Watson, going to Paradise Farm, Teaneck, N. J. Two of the horses received slight injuries during heavy weather.

The Rhode Island left Glasgow, March 3, and was delayed by almost continuous westerly gales. On four occasions it was necessary to heave the vessel to prevent injury to the live stock by excessive rolling and pitching. On this account the passage to Boston was prolonged five days.

On March 15, in lat. 42 degrees 30 minutes N. lon. 47 degrees 45 minutes W., on the eastern edge of the Grand Banks, the steamer encountered heavy field ice which extended as far as the eye could reach. In order to escape the ice the vessel was headed in a southerly direction, making a long detour. Meantime a heavy fog shut in and when it cleared the steamer was surrounded by clear water.

The Rhode Island brought only 600 tons of general cargo.—Boston Globe.

REDUCED RAILROAD FARES FOR K. E. A.

Tickets Sold at Reduction Only On April 18-19.

The railroads have granted a fare of 1-1/2 for round trip to Louisville for the annual session of the Kentucky Educational Association, which convenes April 19-22, 1921. This special rate is offered only to members of the association and dependent parties of their families and will be allowed only on presentation at starting point of identification certificate issued by the Secretary of the Association. All persons expecting to attend the meeting should write the Secretary, R. E. Williams, 4518 Southern Parkway, Louisville, for the certificate. County superintendents, city superintendents, principals and others interested school people should see that their teachers enroll and obtain the certificate before coming to Louisville, as the ticket agent will not be in position to allow the reduced fare without the certificate. Tickets will be sold at special reduction only on April 18 and 19.

MONSTER BABY LAMB WEIGHS 18 POUNDS.

A ewe belonging to W. R. Guyn, of Troy neighborhood, gave birth recently to a lamb weighing 19 pounds. This monster lamb is living and seems perfect in every way. So far as known this is believed to be the largest lamb recorded as borne by a ewe at birth. It is regarded as quite a curiosity by those who have seen it.—Elizabeth-town News.

GARRAGE AT CAMP ZACHARY TAYLOR

One of the many buildings at the Cantonment which will be torn down in order that the lumber and other materials used in construction may be utilized elsewhere.

In the sale of Camp Zachary Taylor, at auction, beginning Monday, April 25, the cost of building material will be reduced in such drastic manner that the many who have for several years past been living in uncomfortable and crowded conditions, because of the shortage of homes, will be enabled to procure, at their own price, all material necessary for building.

Many million feet of kiln-dried lumber was selected for the construction of this Cantonment, and it was subjected to the most rigid inspection. Having been exposed to the weather for only a short time, it is practically as good as new, and for rough construction work and outdoor purposes on the farm or in the building of a home, it will answer every purpose that lumber fresh from the mill does, and will doubtless sell for considerably less money.

The same is true regarding the plumbing and heating equipment that was used at the camp. This will be sold in small lots so that the small buyer will be in as good a position to take advantage of these bargains as the large buyer who is able to buy several carloads.

The 2,000 buildings will be offered one at a time, and the successful bidder will have the privilege of buying one or more of the particular type of building upon which he made his bid.

Many of the buildings will require but the addition of a porch and a rearrangement of the inside partitions to make them comfortable homes, while

if one wishes to go to the further expense of applying steel lath on the sides and putting stucco on the lath, an artistic, thoroughly modern home could be had for a mere fraction of what it would cost were it not possible to secure this Government property at one's own price, at auction.

The sale will begin on Monday, April 25, and continue until all of the 2,000 buildings and 2,000 acres of land are disposed of. Needless to say, this will be an absolute sale, and the Government will reserve nothing, but will dispose of it all to the highest bidder.

There are many stables, cressote water troughs and cressote fence post that should particularly appeal to the farmer, who can purchase them at his own figures.

The putting of this mammoth Cantonment on the market for sale at auction will do much to lower the cost of building. The original cost of buildings and land comprising the Cantonment was \$10,000,000. It will be sold for just what it will bring at auction. A sale of this magnitude has never before been held in Kentucky, and it offers an unparalleled opportunity to those desiring to purchase building material of every description. The taxpayers who furnished the money to build Camp Zachary Taylor will have an opportunity here to profit by the sale of the land and building material, which will be sold at auction by the Louisville Real Estate and Development Company, of Louisville, who will serve as sales agents for the War Department.

UNEMPLOYED ARE ON THE INCREASE

Farm Labor Shows an Increase Large Per Cent of Unemployed Among Steel and Iron Workers.

Washington, April 6.—In spite of renewed activity in automobile plants and a resumption of operations in three or four other industries, industrial unemployment in the United States continued to increase during March, according to Labor Department statistics.

From all sections, however, increased employment on farms was indicated in the verbal returns made by Federal Agents, though the actual number of men so engaged was not susceptible of statistics presentation. The department found that 1,424 industrial establishments in the United States, ordinarily employing more than 500 men each, had 1,587,786 workers on payrolls March 31, against 1,612,611 February 28, net decrease of 24,825, or 1.5 per cent. The March number was 40,308, or 2.5 per cent less than the total January 31.

By far the largest proportion of the unemployment increase during the month was due to cessation in steel and iron operations, through other metal, textile and food manufactures also noted drops. Out of sixty-five cities and industrial centers from which reports came forty-four showed increased unemployment, while a decrease was found in 21.

Detroit with 25,671 workers re-employed in automobile factories during March, showed the most favorable condition, while Pittsburgh, with the reduction in steel operations, showed 12,305 fewer persons on payrolls Mar. 31, than at the end of the previous month.

In New York 7,064 were added to the total unemployed during the month, according to the Labor Department summary, while in Milwaukee the total was 6,525 and in Chicago 4,540.

FATHER'S RHEUMATISM

"What's that for?" said a mother to her son, who had just brought home a barometer.

"O, it's a great idea, mother. Tells you when it's going to rain."

"What's the use of wasting money on that when Providence has given you your father rheumatism?" said mother.

CHICKEN OWNERS ARE LIABLE FOR DAMAGE

Court of Appeals in Ky., Declares Chicken Law of State.

Shelbyville.—For the first time in the history of Kentucky, the Court of Appeals, in the recent case of Adams Bros., vs. Clark, declared the chicken law of the State. The court holds in substance that the owner of trespassing chickens is liable for damage done by them and that it is the duty, under the law, of every owner to take care of his or her chickens and prevent them from trespassing and damaging a neighbor. Among other things in the very interesting opinion delivered in the case, the court said:

"It is natural propensity of domestic fowls to rove, and doing so to wholly disregard property lines and even fences. This propensity is well known to all owners, and when an owner with this knowledge allows his fowls to run at large to the injury of his neighbors, he is a wrong doer and is liable for trespass, even in the absence of a statute or ordinance to that effect."

WHEAT CROP IS FOURTH LARGEST

In History of Country Total Production of 621,000,000 Bushels.

Washington, April 7.—A winter wheat crop fourth largest in the country's history was forecast today by the department of Agriculture with a total production of 621,000,000 bushels. This is 44,000,000 bushels more than harvested last year.

The condition of the crop improved 3.1 per cent from last December 1, the April 1, condition being 91 per cent of a normal. The crop of 1919 was the largest of winter wheat ever grown, with 729,000,000 bushels.

The area sown last fall was 40,605,000 acres, and it is believed the abandonment has been small. The 1920 crop was sown on 41,757,000 acres, of which 37,773,000 acres were harvested while the record crop of 1919 was harvested from 49,105,000 acres.

Winter wheat condition April 1, year was 75.6 per cent of a normal and production 377,763,000 bushels. On April 1, 1919, it was 99.9 per cent and production 729,503,000 bushels, while the ten-year average condition is 83.6 per cent.

Production of rye was forecast as 66,386,000 bushels from a condition of 90.3 per cent of a normal.

Rye condition a year ago was 86.8 per cent of a normal and production last year was 69,318,000 bushels, in 1919 condition was 90.6 and production 88,909,000 bushels, and the ten-year average condition is 88.4.

Winter wheat condition by principal producing States was: Pennsylvania, 97; Ohio, 87; Indiana 89; Illinois, 96; Michigan, 90; Missouri 93; Nebraska, 93; Kansas, 88; Texas, 88; Washington, 100.

POOR SEED THREATENED BY LATE-MATURING CORN.

Lexington, April 9.—Seed corn matured late last fall and unless given special care during the winter will not be as good for seed this spring as it should be, according to members of the Soils and Crops Department of the State College of Agriculture. The specialists are recommending that if farmers have any doubt about the germination of their seed that they give it a thorough test before planting. Complete details concerning the individual ear test by means of the "rag doll" method may be obtained by writing the Experiment Station, Lexington.

What is said to be the oldest harp in the world is preserved in the Louvre Museum in Paris. It was found in an Egyptian tomb and is nearly 4,000 years old.

TANLAC PROVED GLAD SURPRISE

It Has Entirely Restored Her Health and She Feels Like a New Woman, She Says.

"I have taken many medicines and spent hundreds of dollars looking for relief, but it was only when I got Tanlac that my troubles disappeared," said Mrs. A. Worley, of 111 Fifteenth St., Ashland, Ky.

"I had no appetite and my stomach was in such bad condition that gas would form, causing a terrible depression around my heart and almost shutting off my breath. I would become so nauseated that I could scarcely retain the little I did eat, and at times I had such awful headaches and dizzy spells I could hardly see."

"My kidneys bothered me a great deal and my back pained me so I couldn't bend over without suffering agony. I was almost a nervous wreck and at night sleep was almost impossible."

"Tanlac has certainly proved a glad surprise to me, for it has taken only two bottles to overcome all my troubles. My appetite is wonderful and I never feel a sign of indigestion or gas. My breathing is free and easy and I no longer have those awful dizzy spells."

"My kidneys don't bother me any more and my back is entirely free from pain. My nerves are in such good condition that I don't wake up during the night, and I'm so much better in every way I simply feel like a new person."—Advertisement.

CIRCULAR NUMBER 67 IS COMPLETE GARDEN GUIDE.

Lexington, Ky., April 9.—What is said to be one of the most complete collections of facts and information relative to the home vegetable garden is contained in Circular No. 67 issued by the Extension Division of the State College of Agriculture.

The publication includes a number of discussions on various subjects relating to the garden in addition to such features as a table of the first killing frosts in Kentucky, a table showing how, when and where to plant, and discussions relative to the control of garden insects and plant diseases. It may be obtained free by writing the Experiment Station, Lexington.

FORDSVILLE PLANING MILL COMPANY

Jake Wilson, Manager,

Fordsville, Ky.

Can you do it? Every day?

Not—and if you have a Sharples Suction-feed Separator you don't have to, for it skims equally clean whatever speed you turn. But with every other separator you must turn the crank at just exactly the speed stamped on it, or you will lose cream—every time! The wonderful Sharples Suction-feed varies the milk feed in direct proportion to the separating force—never more milk in the bowl than it can perfectly separate. All other separators have a fixed milk feed. Thus when turned below speed much of the milk runs out without being perfectly separated, and some gets into the cream, making it thin and uneven. Thousands of actual tests have proven that 19 out of 20 persons do turn too slow most of the time, and that everybody turns too slow some of the time. Get a

SHARPLES Famous Suction-Feed "Skims clean at any Speed" SEPARATOR

the only separator that:

- skims clean at widely varying speeds
- gives the same thickness cream regardless of speed
- skims your milk quicker when you turn faster
- has only one piece in bowl—no discs, easy to clean
- has knee-low supply tank and once-a-month oiling

Sharples is positive insurance against carelessness and its consequent cream waste, because it skims clean at any speed. A speed indicator, which rings a bell when you turn an old-style fixed-feed separator below speed, is really an acknowledgment of the vast superiority of Sharples, which automatically prevents losses from irregular turning instead of simply announcing them. Call at my store and I will be glad to demonstrate to you this and the other superior features of the Sharples.
